## Summary

Frontend Developer with experience since 2021, specializing in Vue.js, Vuetify, Vuex, and VueRouter. I have positively impacted the lives of developers and clients through UI/UX solutions that enhance user experience and application performance. I always strive to apply best development practices, increasing test coverage and implementing scalable architectures.

---

## Experience

### Mid-Level FrontEnd Developer

TradeUp Group | August 2024 - Present

- Development of features that improve the experience of retail sellers in major Telecom companies such as Claro, Vivo, and Tim.
- Worked in the squad responsible for Claro's products, with critical contributions during high-demand periods and bug fixes.
- Implementation of UI/UX improvements that increased seller efficiency.

### Mid-Level FrontEnd Developer

Confidential | August 2022 - August 2024

- Development of predictive and proactive analysis solutions using VueJS, Vuetify, Vuex, VueRouter, Storybook, Elasticsearch, and Jest.
- Implementation of the Vertical Slice architecture as a POC, later adopted in all FrontEnd projects of the squad.
- Increased automated test coverage by 20%, ensuring greater code stability and quality.

### Junior Frontend Developer

Farmtech | July 2021 - July 2022

- Contributed to the digitization of credit in agribusiness by creating features that optimized processes and improved user experience.
- Migration of a project from a monolith to microservices.
- Initiative to implement end-to-end testing with Cypress.

### Junior FullStack Developer

Inking | September 2020 - July 2021

- Created a data migration project from SQLServer to MySQL using Java with SpringBoot.
- Responsible for the FarmTech credit area, fixing bugs, creating features, and making UI/UX decisions using VueJS, Vuetify, Vuex, and VueRouter for frontend

and Java, SpringBoot, Swagger for backend.

---

## Education

### Technologist in Systems Analysis and Development

Universidade Presbiteriana Mackenzie | August 2021 - December 2025

---

## Other Projects

### Junior Frontend Developer

PortariaJa | September 2020 - February 2021

- Development of pages for system administrators, allowing control of entry and exit in condominiums using facial recognition.

### Frontend Developer and TechLead

Gestio School | November 2023 - Present

- Technical leadership in the development of a school management platform, including class creation, student and staff aggregation.
  - Implementation of end-to-end testing with Cypress.
  - Decisions on project architecture and design system, resulting in a 50% reduction in development time.
-
