Summary

Frontend Developer since 2021 specializing in the Vue.js ecosystem, including Vue 2/3, Nuxt.js, and Vuetify. Proven expertise in building scalable architectures, improving application performance, and providing technical leadership. Experienced in developing B2B tools, corporate event platforms, and data analysis systems. Strong focus on implementing development best practices, increasing automated test coverage, and mentoring junior developers.

Professional Experience

Frontend Developer

I Go Eventos | August 2025 - Present

- Developed tools for managing guest RSVP and live interactions for corporate events.
- Built a lead collection system with full offline functionality using IndexedDB and Dexie.js, capable of processing over 50,000 records per event.
- Established project architecture standards and Git workflows for commits and pull requests.
- Mentored junior developers and conducted internal training sessions on project management tools like Trello.

FullStack Developer

Aggressive Solutions | March 2025 - July 2025

- Developed a performance analysis dashboard with data visualization using Leaflet, Chart.js, and Ag-Charts.
- Built scalable and sustainable RESTful API endpoints with Node.js and Drizzle ORM.
- Maintained code quality and project longevity through componentization and implementation of frontend and backend best practices.

Mid-Level Frontend Developer

TradeUp Group | August 2024 - March 2025

- Enhanced platform features for retail sales representatives of major telecom companies including Claro, Vivo, and Tim.
- Contributed critically within the Claro product squad during high-demand periods and for bug resolutions.
- Implemented UI/UX improvements that increased the efficiency of the sales team.

Mid-Level Frontend Developer

Confidential | August 2022 - August 2024

- Developed predictive and proactive analysis solutions using VueJS, Vuetify, Vuex, VueRouter, Storybook, ElasticSearch, and Jest.
- Successfully implemented a Vertical Slice architecture as a proof-of-concept, which was later adopted across all FrontEnd projects in the squad.
- Increased automated test coverage by 20%, ensuring greater code stability and quality.

Junior Frontend Developer

Farmtech | July 2021 - July 2022

- Contributed to the digitization of agricultural credit by creating features that optimized processes and improved user experience.
- Participated in the migration of a project from a monolithic to a microservices architecture.
- Initiated the implementation of end-to-end tests using Cypress.

Education

Associate Degree in Systems Analysis and Development

Universidade Presbiteriana Mackenzie | August 2021 - December 2025

Technical Skills

- **Frontend & Frameworks:** Vue.js 2/3, Nuxt.js, Vuetify, Vuex, Pinia, Vue Router, PrimeVue, JavaScript, CSS, Tailwind CSS, SASS, StyledComponents
- **Testing:** Jest, Cypress, JUnit
- **Tools & Platforms:** Git, GitHub, GitLab, Jira, Storybook, ElasticSearch
- **Backend & Databases:** Node.js, Java, Spring Boot, Drizzle ORM, MySQL
- **Methodologies:** Scrum, Kanban, Agile, Vertical Slice Architecture, Componentization

Languages

- **Portuguese:** Native
- **English:** Advanced (Technical Reading and Writing)

Additional Projects

Tech Lead & Frontend Developer

Gestio School | November 2023 - May 2024

- Provided technical leadership in the development of a school management platform, including class creation and management of students and staff.
- Implemented end-to-end tests using Cypress.
- Made key architecture and design system decisions that reduced development time by 50%.

Junior Frontend Developer

PortariaJa | September 2020 - February 2021

- Developed administrative pages for a facial recognition entry/exit control system for condominiums.
